Important Information

What makes Feeding Frenzy Chum and Tackle Chum Tubs revolutionary? You can use this chum anywhere, and without the need to tie it to your boat, or create messes trying to get it into a drip or tube dispenser, or having to keep the smelly, frozen block in with your food and drinks in the cooler during those long offshore runs!

We made this chum specifically to be used from your boat, Pier, or land. It is totally biodegradable and will last between 4-7 hours depending on water flow and conditions. It is also the **ONLY** chum on the market that is as strong at the end as when you first throw it in the water. No ropes between you and the chum for the fish to find as they almost always do. The old method of tying the chum to your boat just insures that the fish will find your boat, and then bolt because they are spooked.

Just take the chum tub out of its container and throw it within casting range of your favorite pier, beach, or boat. Settle in and start fishing with artificial lures, live, or cut bait. This chum is quite strong and will attract and hold fish near your bait! We have Inshore Flats, Offshore Reef, and Shark Formula Tubs to choose from to best suit your fishing needs in just about any situation!

We have perfected our formulas over three years of testing! Feeding Frenzy Chum and Tackle Chum Tubs are the new way to fish in any situation and improve your catch! Visit our website for tips for each species and situation and you will see an improvement in your catch! And remember to take a kid fishing! Pass the knowledge of this pastime on to the next generation! Catch a man a fish and he can eat, but teach him to fish and he can feed himself for a lifetime.

Chum Comparison

Dry Chum	Frozen Chum
Expensive	Expensive
Disperses too quickly	Messy
Oils lost Rapidly	Requires Refrigeration
Impractical	Bulky
Low Strength	Impractical
Floats	Floats

Feeding Frenzy Chum

Affordable and practical! No Mess or Smell while dry. Shelf Stable! No refrigeration ever! Even Oil and Scent distribution that lasts from 4-7 hours depending on current and conditions. As **STRONG** the last hour as the first! Tie it to your boat or toss it where you want to cast! It stays put and holds the fish!

Why use any other chum?

Try our Inshore Flats, Offshore Reef, and Shark Formulas the next time you go fishing and experience the Feeding Frenzy!
